

Restoring Our Refuges: A Plan for North Carolina

Pocosin Lakes National Wildlife Refuge lost its only park ranger, reducing the hours of operation to just 24 hours per week. The refuge also lost maintenance staff, resulting in a 50% reduction in road maintenance and over 50 miles of closed visitor roads.

One of America's most popular pursuits – fishing – could reach more people at Mackay Island National Wildlife Refuge if its plans to build a fishing pier come to fruition. The refuge is seeking to create access for people with disabilities to get to the shoreline and to enable youngsters to reach the area.

Roanoke River Wildlife Refuge

The National Wildlife Refuge System struggles to meet its wildlife conservation mission

In North Carolina alone, 70 mission-critical projects sit on the shelf.

North Carolina is home to spectacular natural resources including 10 National Wildlife Refuges that serve as protection for the state's coastline, marshes, swamps, grasslands, and forests. The refuges also provide important habitat for countless species of birds, fish, reptiles, and mammals, including the last wild population of the endangered red wolf.

In 2008, more than 1.9 million visitors enjoyed hiking, birding, wildlife photography, environmental education, and hunting and fishing on North Carolina refuges.

Yet, national wildlife refuges in North Carolina may not be able to continue protecting wildlife and offering world-class recreation. North Carolina wildlife refuges are saddled with deferred operations and maintenance projects that exceed \$109.7 million.

Today, the state's wildlife refuges need at least 68 additional positions. Those include 22 wildlife biologists, 14 guides and educators, and 22 essential maintenance and enforcement personnel. Without these people, North Carolina refuges will fall further behind in meeting the demand.

What's the solution? CARE recommends \$514 million for the Refuge System's FY 2010 Operations and Maintenance budget and an increase to at least \$765 million by FY 2013

About C.A.R.E.

The Cooperative Alliance for Refuge Enhancement is a diverse coalition of 22 conservation, recreation, sporting, and scientific organizations with more than 14 million members and supporters across the United States. CARE has been working since 1995 to help the National Wildlife Refuge System fight a serious funding crisis.

Saddled with declining purchasing power and a \$3.5 billion backlog of deferred operations and maintenance projects, the National Wildlife Refuge System is in a financial vise.

The Refuge System needs an annual increase of \$15 million in its operations budget just to keep pace with inflation and demand. The Refuge System welcomed more than 41.2 million visitors in 2008, up from 33 million in 1998.

National Wildlife Refuges are undeniable economic engines. According to the *Banking on Nature* report from the FWS:

- Spending by visitors to refuges generated more than \$1.7 billion of sales nationwide, created 27,000 jobs in local communities and added \$543 million in employment income. These economic data do not include Alaska or Pacific island refuges, which together generate millions of annual visitors.
- At **Pea Island National Wildlife Refuge** in North Carolina, for every \$1 spent on the refuge's budget, nearly \$414 are generated in recreational expenditures to the local economy. Recreational visitor spending totaled nearly \$90 million, generating 1,238 jobs, \$28 million in employment income and \$13.7 million in tax revenue.

Yet, according to Management Systems International, a respected business consultant, the Refuge System has seen its real purchasing power decline by 11 percent between fiscal years 2003 and 2008.

The Government Accountability Office found that with continuing funding constraints and an expanding list of challenges, it may be difficult to maintain the Refuge System as envisioned in law – “where the biological integrity, diversity, and environmental health of the Refuge System are maintained; priority visitor services are provided; and the strategic growth of the system is continued.”

There is a solution to safeguard the world's finest network of public lands dedicated to wildlife conservation: \$514 million in FY 2010 for the National Wildlife Refuge System and an increase to at least \$765 million by FY 2013 – steps that will restore operational quality and begin to chip away at the deferred operations and maintenance backlog.
